

## Texas Range Local Government Investment Program

The TexasTERM Local Government Investment Pool, now doing business as the Texas Range Investment Program ("Texas Range" or the "Program") was established by the Common Investment Contract, in conformity with Chapters 791 (Interlocal Cooperation Act) and 2256 (Public Funds Investment Act) of Texas Government Code.

Texas Range is directed by an Advisory Board, which is made up of experienced local government finance directors and treasurers.

Texas Range offers a range of services to assist Investors/Participants with their investment and arbitrage compliance needs, including:

- **Daily liquidity, including transactions by wire and/or ACH**
- **Unlimited investments and redemptions**
- **Unlimited sub-accounting to track multiple revenue sources or projects**
- **Arbitrage rebate tracking for proceeds of tax-exempt bonds**
- **Online account access**

## Investment Objective

To earn the highest income consistent with preserving principal and maintaining liquidity, and to maintain a stable \$1.00 net asset value ("NAV").

## Investment Philosophy

The Program's adviser seeks to optimize investment returns through careful analysis and investment in short-term governmental securities and other high-quality money market instruments while preserving the safety and liquidity of the underlying principal.

<sup>1</sup> Current 7-day net yield, also known as the current annualized yield, represents the net change, exclusive of capital changes and income other than investment income, in the value of a hypothetical account with a balance of one share (normally \$1.00 per share) over a seven-day base period expressed as a percentage of the value of one share at the beginning of the seven-day period. This resulting net change in account value is then annualized by multiplying it by 365 and dividing the result by seven.

<sup>2</sup> Weighted Average Maturity: Calculated by the final maturity for a security held in the portfolio and the interest rate reset date. This is a way to measure a fund's sensitivity to potential interest rate changes.

<sup>3</sup> As of the last day of the month. The 30-day yield represents the net change, exclusive of capital changes and income other than investment income, in the value of a hypothetical account with a balance of one share (normally \$1.00 per share) over a 30-day base period expressed as a percentage of the value of one share at the beginning of the thirty-day period. This resulting net change in account value is then annualized by multiplying it by 365 and dividing the result by 30. Past performance is no guarantee of future results. Yields will fluctuate as market conditions change. The current fund performance may be higher or lower than that cited.

The yields shown may reflect fee waivers by service providers that subsidize and reduce the total operating expenses of the Program. Program yields would be lower if there were no such waivers.

<sup>4</sup>The TexasDAILY and TexasDAILY Select portfolios have received a AAmmf rating from Fitch Ratings (Fitch). The Fitch AAmmf rating reflects Fitch's review of the portfolios' overall credit quality and diversification and low exposure to interest rate and spread risks as well as the capabilities and resources of PFM Asset Management LLC as investment adviser. According to Fitch's rating criteria, the AAmmf rating signifies an extremely strong capacity to achieve each portfolio's investment objective of preserving principal and providing shareholder liquidity through limiting credit, market, and liquidity risk. However, it should be understood that this rating is not a "market" rating nor a recommendation to buy, hold or sell the securities. For a full description on rating methodology, visit Fitch Ratings (<https://www.fitchratings.com/>).
